Crossroads Facility Services to Provide Landscape Maintenance for City of Yuba City, Investing in Local Economy

Contract begins March 1 with goal to shop and hire locally to strengthen the community

Sacramento, California – February 3, 2012 – On Tuesday, January 17, 2012, the City Council of the City of Yuba City unanimously voted to award a one-year landscape maintenance contract to Crossroads Facility Services (CFS). The Sacramento-based organization plans on supporting the local community and economy by purchasing supplies and equipment from local businesses as well as hiring locally.

As part of the contract, Crossroads will be providing a variety of services including litter control, fertilization, pest management, weed control, pruning, mowing, edging, weeding, tree maintenance, soil aerating, and irrigation repairs.

Though based in Sacramento, Crossroads is not new to the Yuba/Sutter area. Crossroads has been serving the greater Sacramento region for more than 30 years and provides landscaping services to such high visibility local customers as Sun City Lincoln Hills and the City of Lincoln – already employing nearly 20 employees who reside in the Yuba City, Marysville and Olivehurst areas.

“As a resident of Yuba City, I am proud of the partnership between the community I live in and the company I work for,” says Larry White, Director of Operations for Crossroads’ facility services division. “We will use this as an opportunity to support the city’s local economy: we plan on using local employees, shop for materials from local suppliers and purchase equipment from vendors right here in Yuba City.”

While CFS specializes in commercial landscaping and janitorial services, it is part of a larger organization, Crossroads Diversified Services (CDS), a nonprofit which provides employment services, training, consulting and other resources to individuals who have been displaced by unemployment or are unemployed or under-employed due to a disability. Through the nonprofit organization, Crossroads has had a presence in Yuba City for many years – providing benefits counseling and other services to nearly 200 individuals annually through the Sutter One Stop Career Center on Wilbur Avenue.

Empowering through employment.

Crossroads is scheduled to begin landscape maintenance services for the City of Yuba City on March 1.

About Crossroads Facility Services

Crossroads Facility Services is one of few companies in the Sacramento region which provides both commercial landscaping and janitorial services to private sector businesses, home owners associations, and government and public agencies. CFS is a wholly owned subsidiary of Crossroads Diversified Services, a nonprofit which provides employment services, training, consulting and other resources to individuals who have been displaced by unemployment or are unemployed or under-employed due to a disability. CFS contributes nearly ten percent of its annual revenue to CDS in order to fund its nonprofit mission to put people back to work.
